Nurvv Lead iOS Developer Job Spec

Nurvv Limited is redefining the wearables technology space with the introduction of it's maiden product in the running space. By taking a step back and looking at sports in a new way, we have a built a revolutionary product which produces unique insights into running and this is just the start of our journey. We are looking for talented and curious individuals who want to change the way people improve interact with wearables in the quest to improve their performance and technique. We are building highly technical competent teams consisting of all walks of consumer product design.

The successful candidate will be responsible for leading the Nurvv iOS App team, having full ownership of iOS development including mobile app and watch app.

What You Will Be Doing

The iOS Lead will head up the iOS team, be a key contributor in developing code and architecting the iOS platform. The Nurvv platform consists of a sensor based device which interfaces to the iOS App through Bluetooth and talks to a backend database which is used to store and retrieve data.

Nurvv works in an Agile environment with a Product Owner and BA providing stories into the iOS team and a QA team testing against acceptance criteria.

In addition to the fundamentals of iOS mobile app development, the role will include:

- Proficiency with Swift
- Proficiency in Core Data
- Ability to professionally communicate with other team members
- Ability to work independently, breakdown tasks, and work in an Agile environment with incremental product delivery
- Ability to write technical design documentation
- Work with QA/QC to make sure iOS applications are fully tested both functionally and from a unit test standpoint

Preferred Skills

- Experience with AWS or GCP
- Experience in some of our overall system technologies:
    - Realm / MongoDB / REST-like network APIs
    - Core Bluetooth / Bluetooth Low Energy
    - Experience with iOS build system
    - Experience managing Apple Developer Program accounts
    - Experience with Flurry or other analytics services
    - Ability in system/API definition
    - Linux experience

Basic Skills

- Experience with Microsoft office products
- Programming language experience
- Ability to write simple test procedures
- Ability to quickly learn to use bug tracking tools like Jira and Confluence

- Preference for any science, mathematical or computer science background

Education and Experience

- Degree in Computer Science or Mathematics
- 4+ years of experience in iOS development
- 8+ years of overall software engineering experience
